

## COLOUR PACK-C

Mixture of UV-stable pigments designed to colour Ideal Wall, Ideal Tix and Micro-topping.

### DESCRIPTION AND USES

Colour Pack-C is a mixture of UV-stable pigments designed to colour Ideal Wall, Ideal TIX and micro-toppings and other cement-based compounds.

All of the above Ideal Work products have sufficient concrete percentages to withstand the coloured pigments of Colour Pack-C.

Thanks to the dispersant action, Colour Pack-C is able to create a uniform colour throughout the dough.

### COLOURS

Colour Packs-C is available in 17 standard colours.

The hue and the colour will depend on the amount of paint used and the cement product to be coloured.

### MIXING

To colour Micro-topping, Colour Pack-C is formulated to be mixed with up to 1 bucket of liquid polymer.

To colour Ideal Wall or Ideal Tix the mixing ratio is 1:4 (1 bucket of Colour Pack-C every 4 bags of Ideal Wall or Ideal Tix, mixed with water). For lighter shades, reduce the dosage. NEVER EXCEED THE MAXIMUM DOSAGE.

### WARNINGS

To check and approve adequacy and appearance, you should test sections before proceeding with the construction of the wall or floor. Do not use with products other than those specified in this data sheet.

### PACKAGING AND STORAGE

Colour-Pack C is available in 0,500 kg plastic buckets. The weight of the packages may vary according to the specific weight of the colour; some require a higher percentage of pigment than others. We recommend keeping Colour Pack-C in a safe and cold place and not opening the package before use. The shelf life is approximately 12 months.

#### IMPORTANT:

All the information contained in this sheet is based on the best practical and laboratory applications. It is the customer's responsibility to check the product is suitable for the intended use. The manufacturer declines any responsibility for wrong application. It is recommended to carry out tests on small areas before application. This sheet replaces and cancels any previous one. The data contained can be changed at any time. Ideal Work products are for professional use and the company organises periodical training for its customers on demand. Anyone who uses these products without qualification takes all the associated risks.
